Analytics Engineer (all levels)

JustDice

About JustDice

justDice is the European market leader of rewarded apps & games: Our products are enjoyed by more than 100 million players worldwide and we've distributed over $40 million in cash & rewards to our users to date!

As part of the Applike Group (financially backed by media powerhouse Bertelsmann), justDice has access to an extensive toolset and funding with a long-term growth mindset.

We are a team of experts in software development, online marketing, data-driven business intelligence, and app & game design. We are always seeking new creative solutions to complex problems, which has enabled us to release new products fast!

About the Position

We are looking for analytical minded people who are tech savvy and business oriented to help us tackle engineering, data, and business problems in the world of mobile gaming & advertising.

Your responsibilities may vary, but we expect you to help us:

- Maintain and improve our existing data infrastructure.
- Define, monitor, and improve our KPIs.
- Set up product & marketing tests.
- Perform analysis on large & complex datasets.

Your skill set:

- Critical Thinking
- Python, SQL
- Git, AWS (S3, RedShift, Athenas)
- Data Viz
- Critical Thinking (can't get enough of it)

About the Process

We have an open case you can find here. To participate, simply follow the instructions.
